

IN THE DRAWING

Please substitute the accompanying four (4) “Replacement” drawing sheets, containing FIGS. 2 and 4 – 8. All other drawing figures remain in the patent application without amendment.

FIGS. 2 and 4 – 8 have been amended to provide descriptive labels for the boxes of the schematic diagrams of the foregoing enumerated drawing figures.

As part of the first Office Action, the Examiner had objected to the drawing figures of record on the ground that the drawing figures “fail to contain descriptive labels for each item numbered.” It is the understanding of Applicant’s attorney that descriptive labels are generally required only for boxes in schematic or electrical diagrams, rather than being routinely required for “each item numbered,” which would, to a degree, defeat the purpose of even providing reference numerals.

In light of the accompanying “Replacement” drawing sheets, which follow on the next four pages of the instant *Amendment*, Applicant respectfully contends that the Examiner’s drawing objection of the first Office Action has been overcome and should now be withdrawn. In the alternative, clarification of the Examiner’s drawing objection, as set forth in the preceding paragraph, is respectfully requested.
